Chouette Score Sheet

Stake: _____

Options: ☐ Jacoby waived ☐ Beavers ☐ Extras ☐ Partners Other _____

						✔	Notes

Using the chouette score sheet

Starting

Write the per-point stake at the top and tick the options in effect. The Jacoby rule applies unless waived. Write each player's name at the head of a column, in any order; column order has nothing to do with rotation order. See the separate Chouette Rules for how to set up and maintain the rotation during the chouette. Blank columns can accommodate newcomers.

Scoring a game

The Box's game against each opponent is scored separately according to that individual cube: the cube value finally held, or passed, times 1, 2 or 3 for a single, gammon or backgammon, as the Jacoby rule allows.

In each opponent's small box write what that opponent won (+) or lost (–), in points. In the Box's small box write the total of what he won (+) or lost (–). Then, in the large area of each cell, write the new total: the previous total plus the figure in the small box.

Check: Add the small-box figures across the row. They must sum to zero. Add the totals in the boxes across the row. They must sum to zero also. Check the box and start the next game.

Entering and leaving

A new player entering takes a blank column and starts at 0 on the row where he joins. Note his entry in the column at the right.

A player who steps away temporarily keeps his column and his total. For all the games he is away, record 0 in the small box and carry his total down.

A player who leaves for good cashes out. Record the amount he pays (+) or receives (–) in his small box, and record the amount each player pays him (+) or receives from him (–) in the appropriate column. Total up and Check as above: the rows sum to zero, and the cashed-out player has a zero total also. Note his exit in the column at the right.

Finishing

At the end of the chouette, each player cashes out as described above. The total of each player is now 0. Wait for the next chouette.

Worked example

Anne	Bob	Caleb	Daria	✓	Notes	
+4 **4**	-2 **-2**	-1 **-1**	-1 **-1**	✓	*Start of chouette.*	Anne / Bob / Caleb / Daria
-2 **2**	+1 **-1**	+2 **1**	-1 **-2**	✓		Anne / Caleb / Daria / Bob
0 **2**	+1 **0**	-1 **0**	0 **-2**	✓	*Bob is out.*	Caleb / Daria / Bob / Anne
-1 **1**		-1 **-1**	+2 **0**	✓		Caleb / Daria / Anne
-1 **0**		+1 **0**	0 **0**	✓	*End of chouette.*	

Line 1. Anne, in the Box, beats Bob (Captain) with the cube at 2, and beats Caleb and Daria with the cube at 1. Her small box shows +4, and the others show –2, –1 and –1.

Line 2. Caleb is now Captain, Bob is Crew. Caleb wins with his cube at 2 and Bob with his at 1; Daria had already passed Anne's double, so Anne wins 1 from Daria. Anne's net is –2 –1 +1 = –2. Each row's small boxes sum to 0, and the totals do too.

Line 3. Bob leaves the chouette and pays 1 point to Caleb. His small box shows +1, bringing his total to 0; Caleb's shows –1, bringing his to 0. The others record 0 and carry their totals down.

Line 4. Caleb, as Captain, beat the Box in Line 2, so he is now the Box; Daria is Captain and Anne is Crew. Caleb doubles them both. Anne passes, so Caleb wins 1 from her. Daria takes and wins a single with the cube at 2, so Caleb loses 2 to her. His net is –2 +1 = –1. Bob's column is closed and left blank.

Line 5. Everybody cashes out. Caleb pays 1 point to Anne; Daria, at zero, neither pays nor receives. Every total is now 0.
